CUT LIST

48" x 24" Hardwood Plywood

23"

1x2x8

24 1/2"   23"
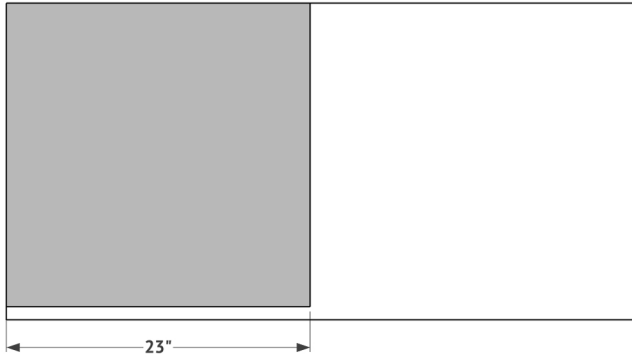

①

Cut the plywood to size. This is when you should paint the plywood. Once the paint is dry, apply the laser print witht the mod podge.

②

While the mod podge is drying, cut the trim pieces to size and stain them. Once the trim is dry, begin by attaching the two side pieces of trim to the plywood. The front of the trim should be flush with the front of the plywood. Attach with 1 1/4" brad nails and wood glue.

Next, measure and cut for the top and bottom trim. Attach the top and bottom trim with 1 1/4" brad nails and wood glue. The ends of the top and bottom trim should be flush with the ends of the side trim.
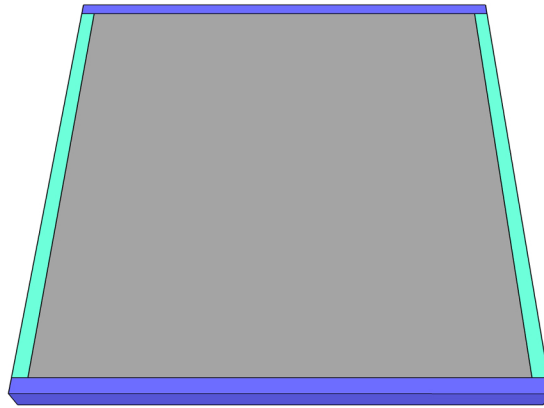

All finished! Use the overhang on the back to hang the frame on the wall! Make sure to share your builds with us on social media and use #shanty2chic so we can share them too!
