## Supply List

| Item                          | Quantity   | Description                           |
|-------------------------------|------------|---------------------------------------|
| 2 x 4 x 8'                    | 1          | Pine or whitewood board               |
| 1 x 6 x 6'                    | 3          | Pine or whitewood board               |
| 2-1/2" pocket hole screws     | 8          | For the 2 x 4 blocks                  |
| 3-1/2" wood screws            | at least 4 | To secure the frame to the wall studs |
| 1-1/4" wood screws            | handful    | To secure the box to the frame        |
| Brad nails                    | handful    | To assemble the box                   |
| Wood glue                     |            |                                       |
| Finish of choice              |            |                                       |
| Decorative hardware of choice |            |                                       |

Drill pocket holes for 2-1/2" pocket hole screws as indicated by the arrows.

1

Secure the 4" blocks to the 58" board with glue and 2-1/2" pocket hole screws. The center two blocks are evenly spaced. Then locate your wall studs and secure it to the wall with at least 2 3-1/2" screws per available wall stud.

2

Using the 1 x 6 pieces, glue and nail the 5-1/2" pieces to the ends of the 58-1/2" pieces. Then glue and nail the front piece on. Make sure the wood grain in the side pieces are going the same direction as the front piece (green).

3

Slide the box over your mounted frame and secure it from the top with a few 1-1/4" screws into the 2 x 4 blocks. I've included a translucent diagram for a better visual representation. I also added some black garage door hardware for a decorative touch. This is a pretty easy project that anyone can make. If you decide to make one don't forget to stop by our website and let us know!
