FLOATING SHELF

SUPPLY LIST

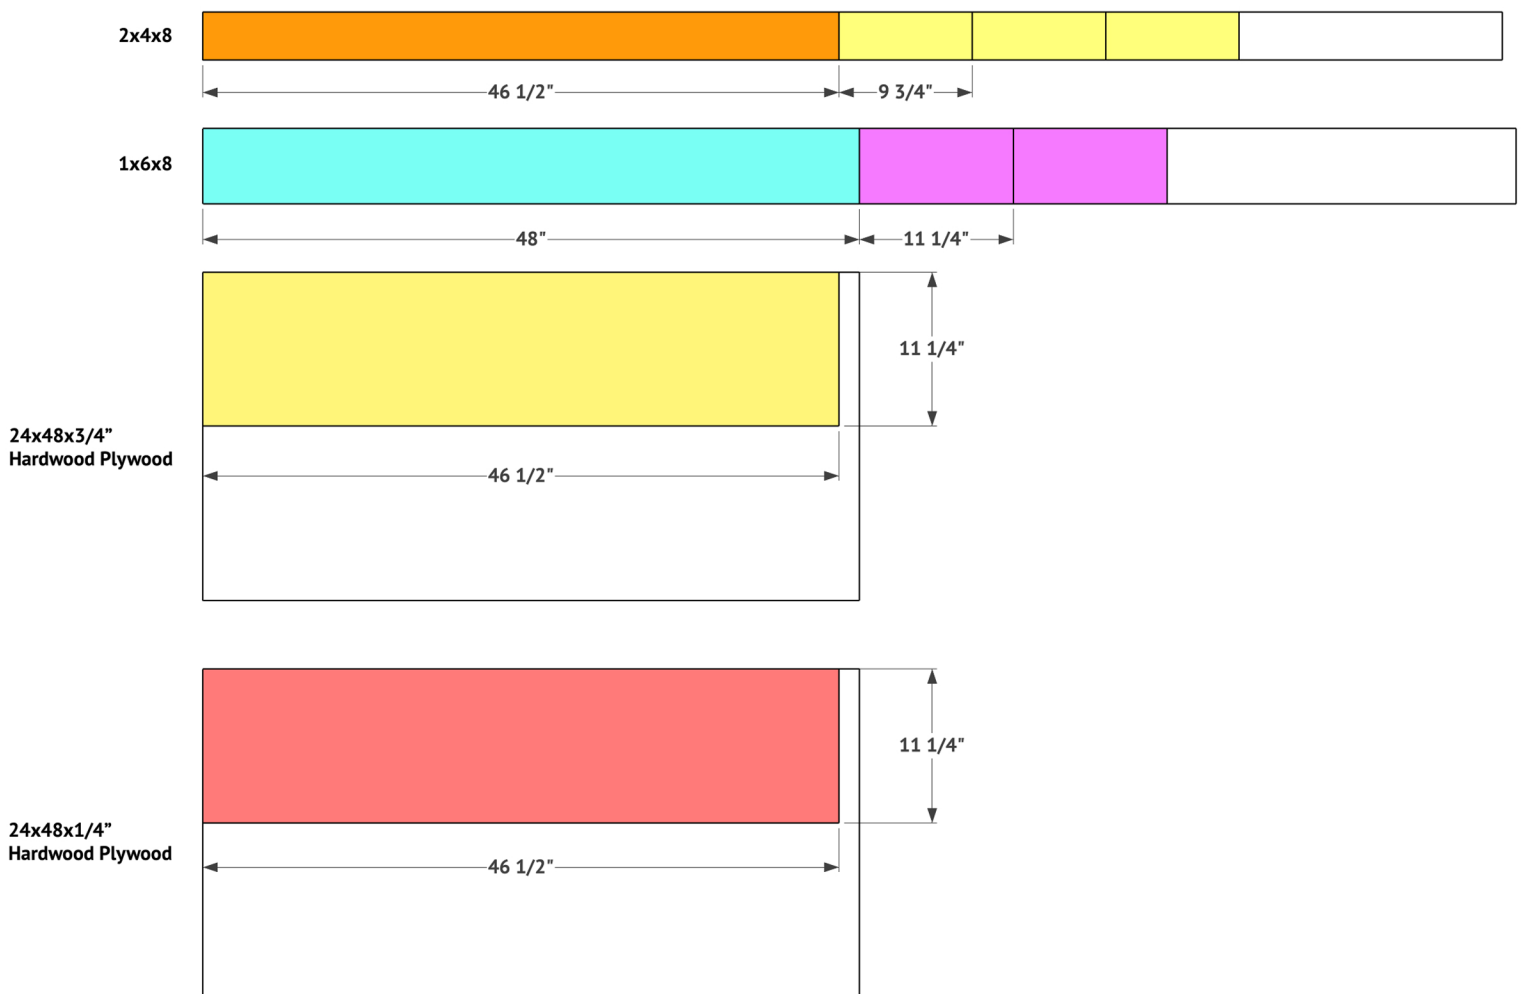

| Item | Quantity | Description |
|-------------------------------|----------|-----------------------|
| 2X4X8 | 1 | Framing Lumber |
| 1x6x8 | 1 | Pine or Common Boards |
| 3/4"x24"x48" Hardwood Plywood | 1 | Birch |
| 1/4x24"x48" Hardwood Plywood | 1 | Birch |
| 1 1/2" Pocket Hole Screws | | |
| 1 1/4" Brad Nails | | |
| 3 1/2" Wood Screws | | |
| Wood Glue | | |

Remember!

Many of these cuts are best made as you go. If you have questions, check out the tutorial on our site!

CUT LIST

Note: This cut list is for one floating shelf. If you build more than one shelf, adjust the cut list.

1

Cut the cleat pieces to size. Drill 1 1/2" pocket holes into one end of each support piece. Attach the support pieces to the long cleat piece with 2 1/2" pocket hole screws and wood glue. Locate the studs behind the wall you are hanging the shelf on and attach the cleat to the wall with 3 1/2" wood screws.

2

Cut the top plywood piece to size and attach it to the cleat with wood glue and 1 1/4" brad nails.

3

Cut the bottom piece of plywood to size and attach it to the bottom of the cleat with 1 1/4" brad nails and wood glue.

4

Cut the side pieces to size and attach them to the side of the cleat with 1 1/4" brad nails and wood glue.

5

Cut the front piece to size and attach it to the front of the cleat with 1 1/4" brad nails and wood glue.

Now, just add a finish and you're done! Make sure to share your builds with us on social media and use #shanty2chic so we can share them too!

Happy Building!
