NOTES

1.

First cut your three 1x3s to length. These will be the vertical supports for the mail holder. Then cut a 45° angle at one end as shown. Repeat with remaining two 1x3 pieces..

2.

Cut your project panel to length. Attach the vertical supports with wood glue and 1-1/4" brad nails using the spacing shown. The 1x3 on the right is flush with the outside edge of the panel. You may want to mark on the back where the vertical boards will be located so you know where to drive the brad nails.

Hold the bottom 1x3 in position and mark it's length. Cut and attach with wood glue and 1-1/4" brad nails.

3.

Cut the front of the mail holder to length and attach with wood glue and 1/2" brad nails.

Finish to your liking and allow to thoroughly dry.

Cut your chalkboard to length. Using either spray-on chalkboard paint or brush-on chalkboard paint cover the front and sides. You may need a few coats. Attach to the back panel with brass thumb tacks.

Attach your brass cup hooks paper clip holders.
