Remember!

Many of these cuts are best made as you go. If you have questions, check out the tutorial on our site!

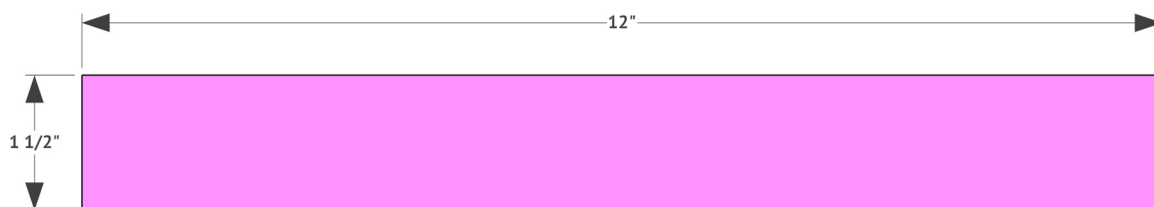

CUT LIST

1x8 scraps

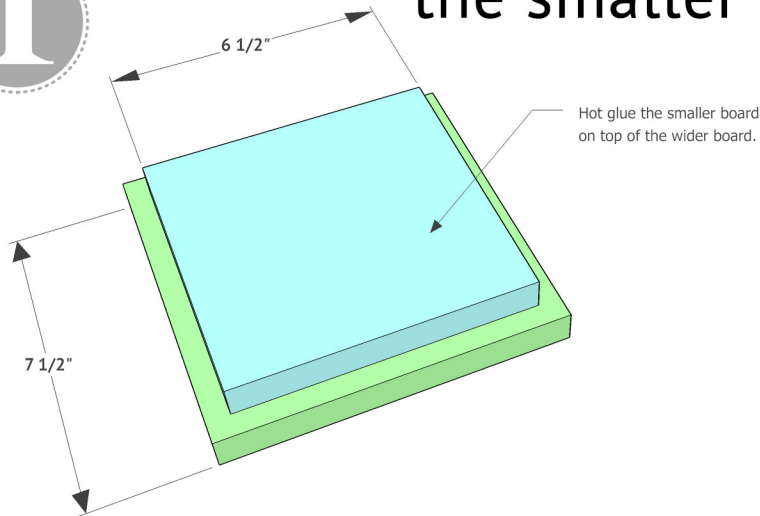

You will use 1 scrap of 1x8 for this project. Make the above cuts from the 1x8. Check your scrap pile before buying wood! This is a great scrap wood project.

1.5" dowel or 2x2 scrap piece of wood

Use a hot glue gun to attach the smaller square to the larger square.

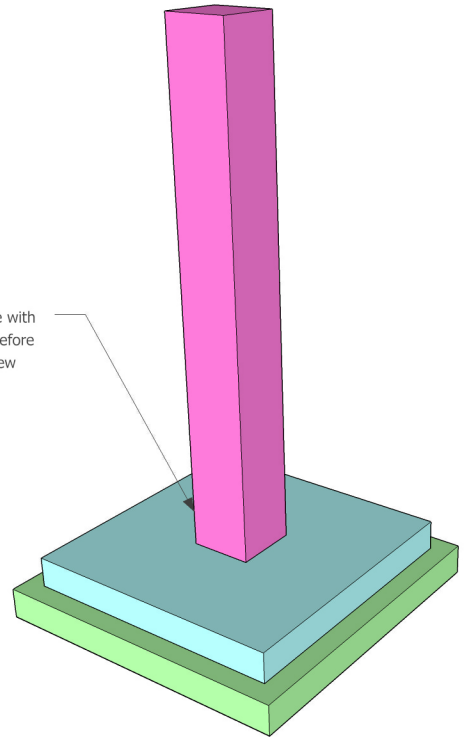

1

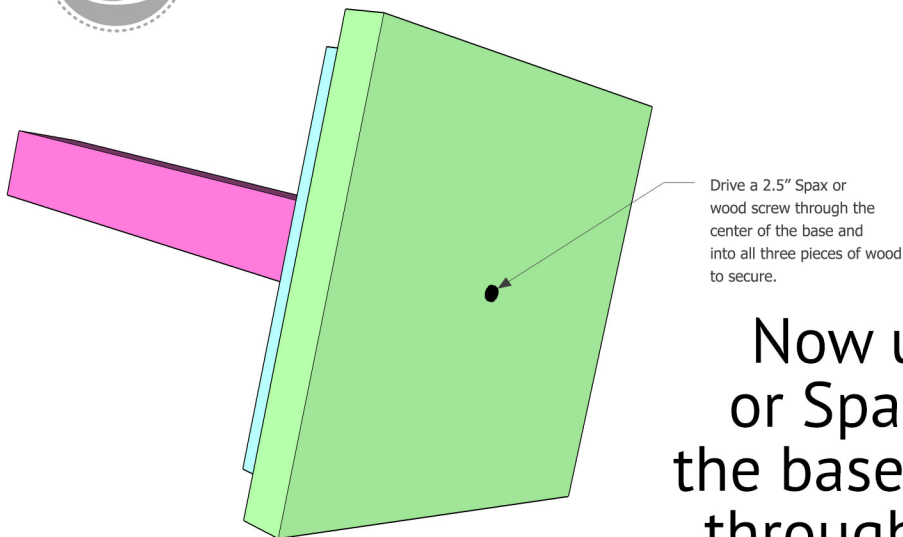

Now attach the long square piece to the center of the top smaller board using hot glue.

Attach the 2x2 piece with hot glue to secure before attaching with a screw from the base.

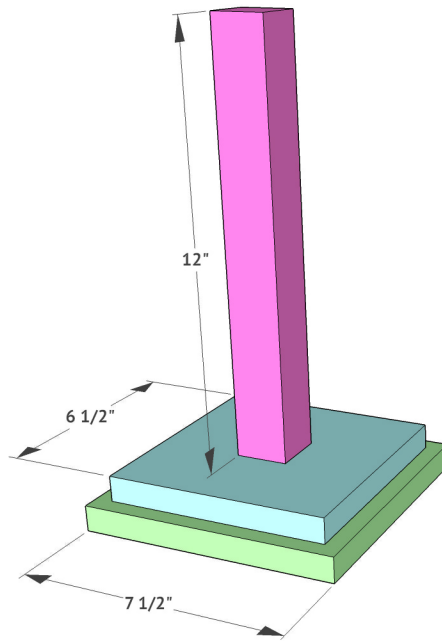

2

3

Now use a 2.5" wood or Spax screw through the base of the bolder and through all three pieces.

Now is the fun part! Stain or paint your mug holder your choice of finish. Use a drill to attach decorative hooks on each side and attach a decorative knob to the top! Be share to tag us on your finished projects so we can share them!
