pocket hole screws	6	1.25"
wood glue		
glue for clips		

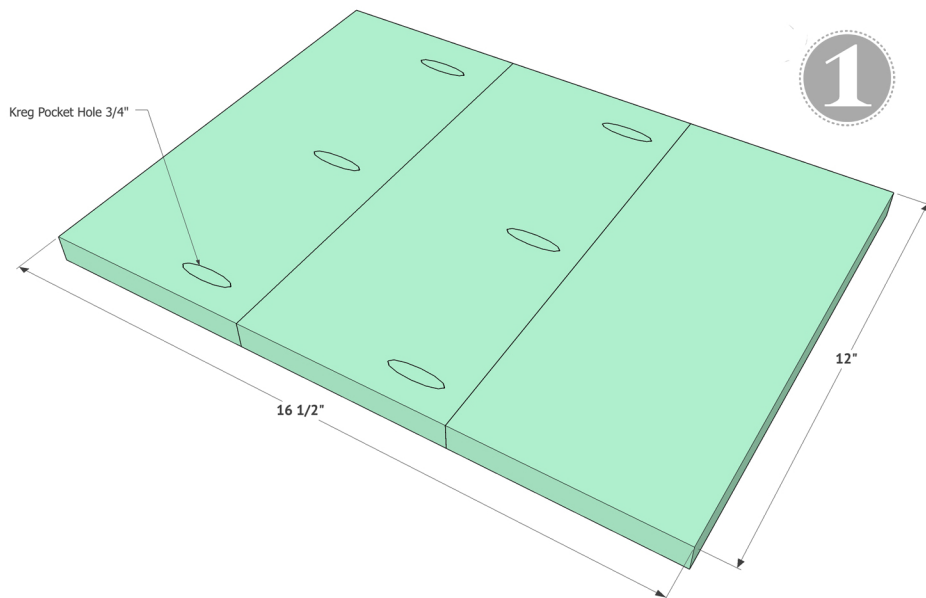

Remember!

Many of these cuts are best made as you go. If you have questions, check out the tutorial on our site!

CUT LIST

This is a cut
list for 1 frame!

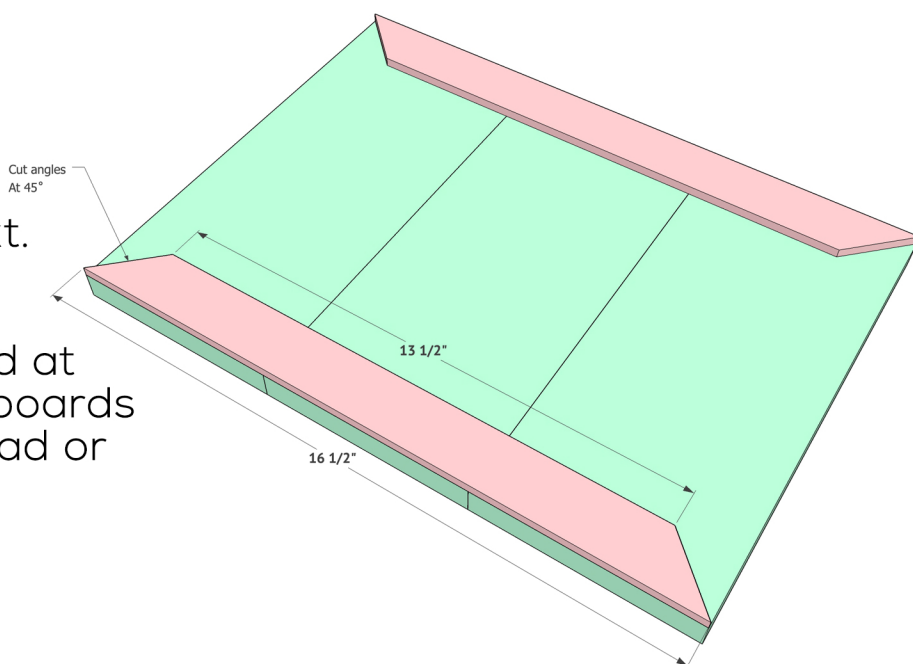

Start by making the cuts for the planks of the frame. These are 1x6 board and you will cut each to 16.5". Add 3/4" pocket holes to 2 of the boards. Attach the boards together using 1.25" pocket holes screws.

2

Add the vertical trim next.

These are 1 1/4" thick by 1.5" wide craft boards.

Cut the ends of each board at a 45° angle. Attach the trim boards using wood glue and 3/4" brad or pin nails.

3

Last step is adding the horizontal trim. Cut each end at a 45° angle. Attach these pieces the same as the others using wood glue and 3/4" nails.

Paint or stain your frames and add your clips! Check out our website for details on how we finished ours!
