DIY Serving Tray

Supply List

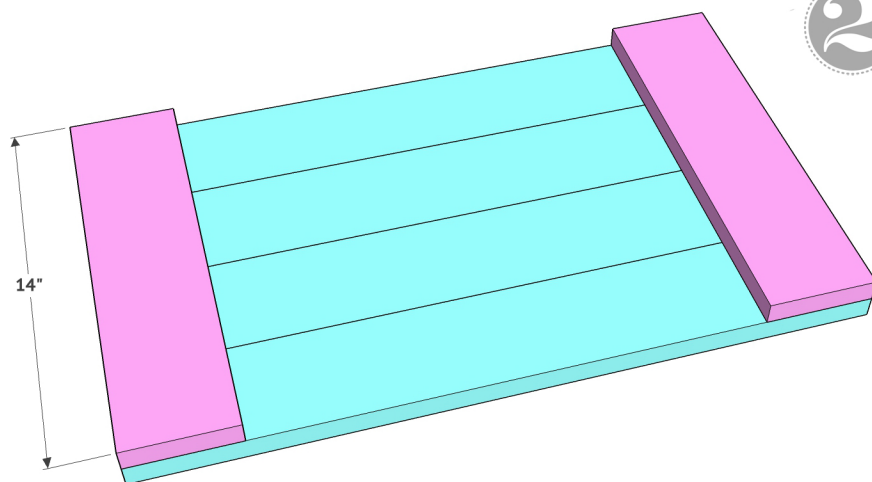

Item	Quantity	Description
1 x 4 x 6	2	pine or whitewood
brad nails		1.25"
wood glue		
metal pulls		Check website for details
Cricut Maker		For personalization

1

Cut 4 boards at 23" long each. These are 1x4 boards. We are using barn wood, but any board will do. Each of our boards is 3.5" wide.

2

Cut the top pieces to match the measurement of all 4 boards placed side by side. If using 1x4 boards, that will be 14" long. If not, measure before you cut. Attach each end board flush with the ends of the longer boards using wood glue and 1.25" brad nails.

Before adding the metal pulls, add a finish to your tray. We used prefinished barn wood, but have fun on this part. We also customized ours using our Cricut Makers! Check out our post for more info!
