Remember!

Many of these cuts are best made as you go. If you have questions, check out the tutorial on our site!

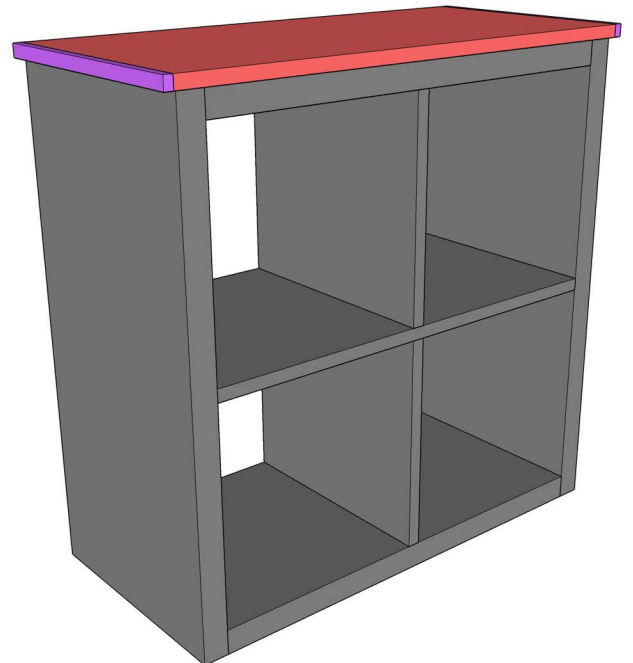

CUT LIST

1 Cut the top panel board to size and attach it to the top of the cabinet with 1 1/4" brad nails and wood glue. There should be a 1/4" overhang on the sides and front of the panel and the panel should sit 1/4" from the back.

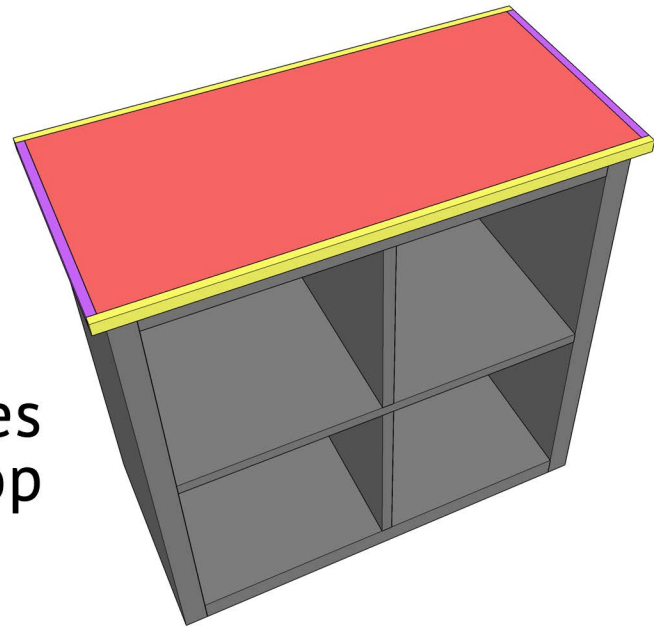

Cut the side trim pieces to size and attach them to the sides of the top panel with 1 1/4" brad nails and wood glue.

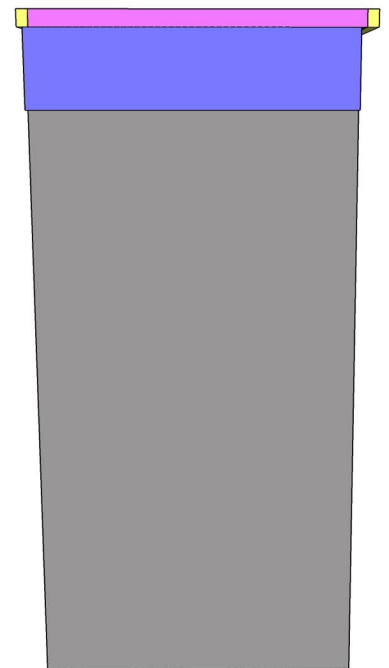

3

Cut the front and back trim pieces to size and attach them to the top panel with 1 1/4" brad nails and wood glue.

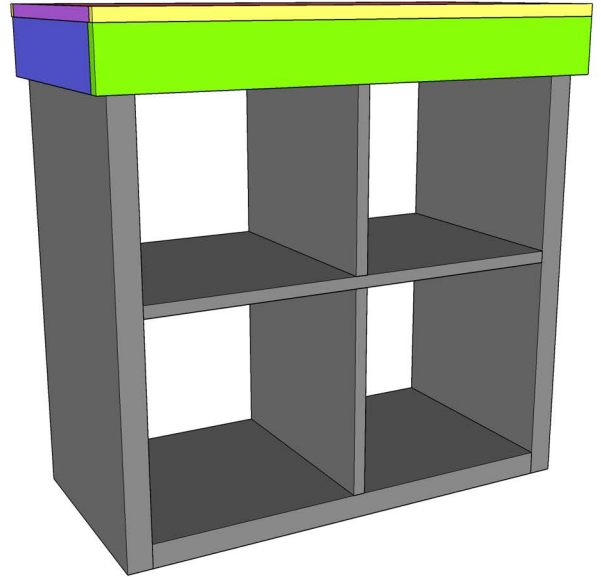

4

Cut the side trim pieces to size and attach them to the sides of the cabinet with 1 1/4" brad nails and wood glue.

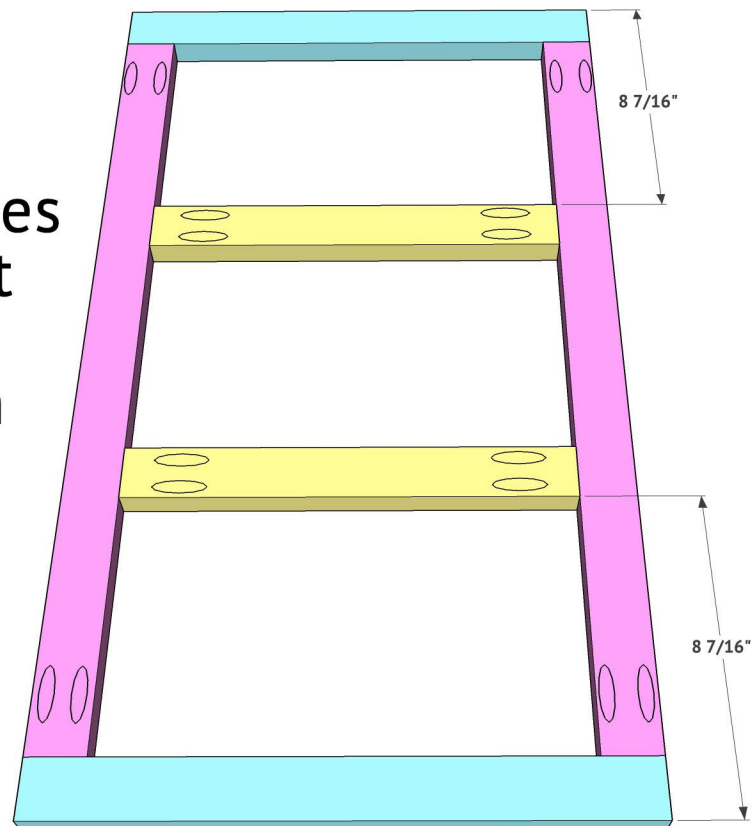

5

Cut the front trim piece to size and attach it to the front of the cabinet with 1 1/4" brad nails and wood glue.

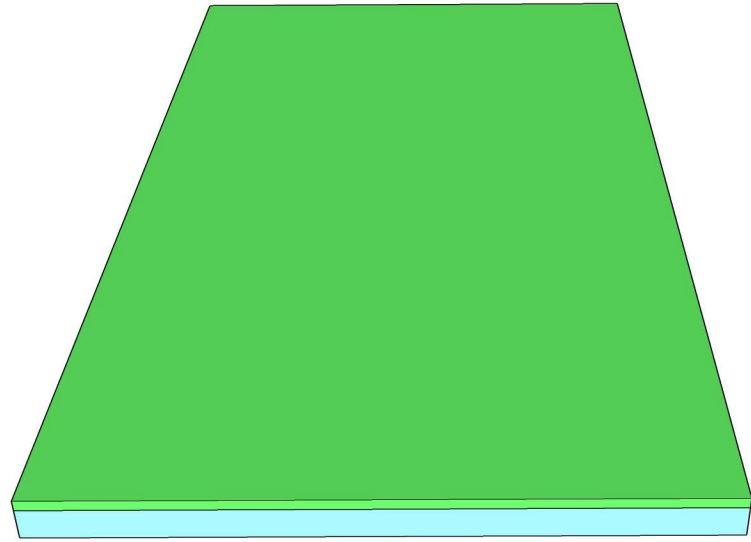

6

Cut the barn door frame pieces to size and drill 3/4" pocket holes in the middle boards and the side boards. Attach them together with 1 1/4" pocket hole screws and wood glue.

Cut the back panel for the barn door to size. Attach it to the back of the barn door frame with 5/8" brad nails and wood glue, through the back panel and into the frame.

Add a finish and attach the barn door to the cabinet with barn door hardware!

Make sure to share your builds with us on social media and use #shanty2chic so we can share them too!

Happy Building!
