DIY Pet Tent

SUPPLY LIST

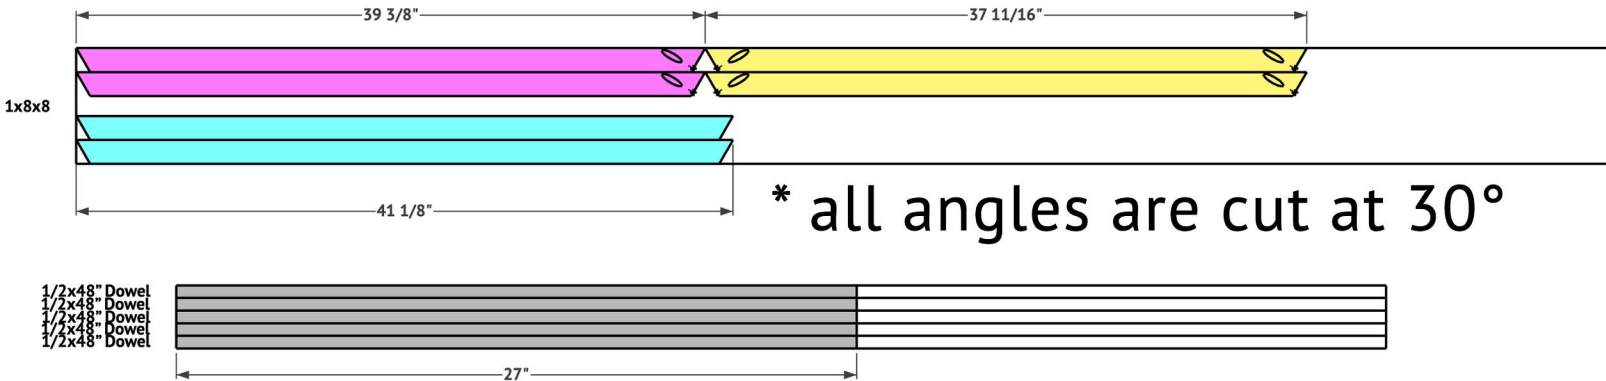

Item	Quantity	Description
1x8x8	1	Pine or Common Board
1/2"x48" Round Dowel	5	Pine
1 1/4" Pocket Hole Screws		
Wood Glue		
Fabric		Link in Post
Scrap 1x6 for Sign		

Remember!

Many of these cuts are best made as you go. If you have questions, check out the tutorial on our site!

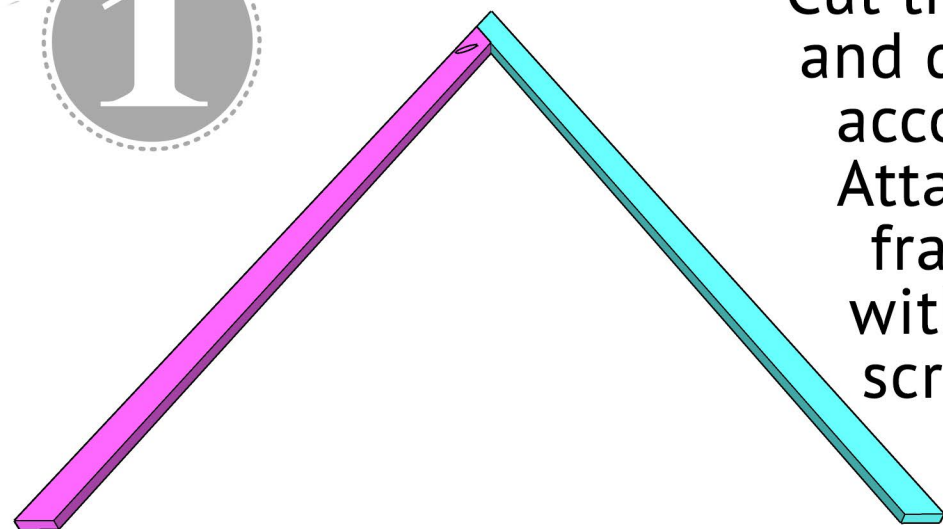

CUT LIST

Note: I ripped the 1x2 boards from a 1x8x8 board to save money. You can purchase four 1x2x8 boards instead.

1

Cut the frame pieces to size and drill $\frac{3}{4}$ " pocket holes, according to the cut list. Attach the left and right frame pieces together with $1 \frac{1}{4}$ " pocket hole screws and wood glue.

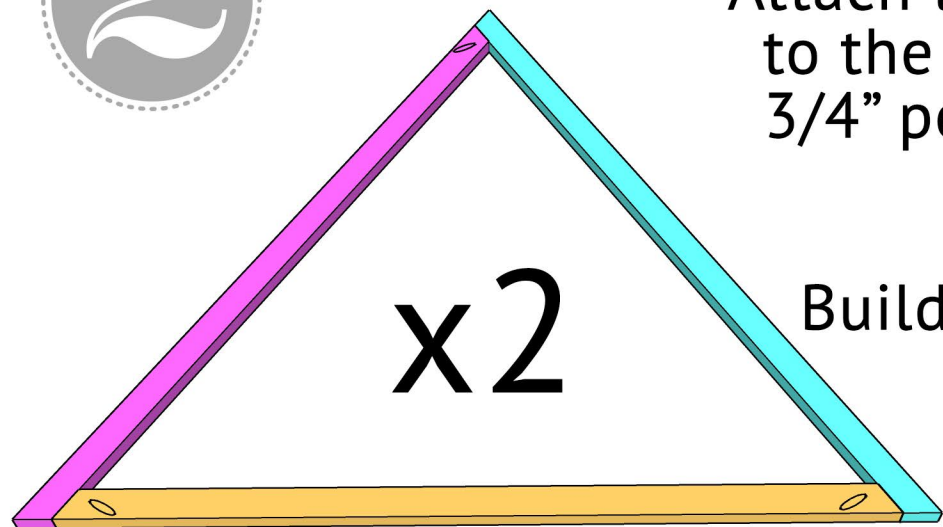

2

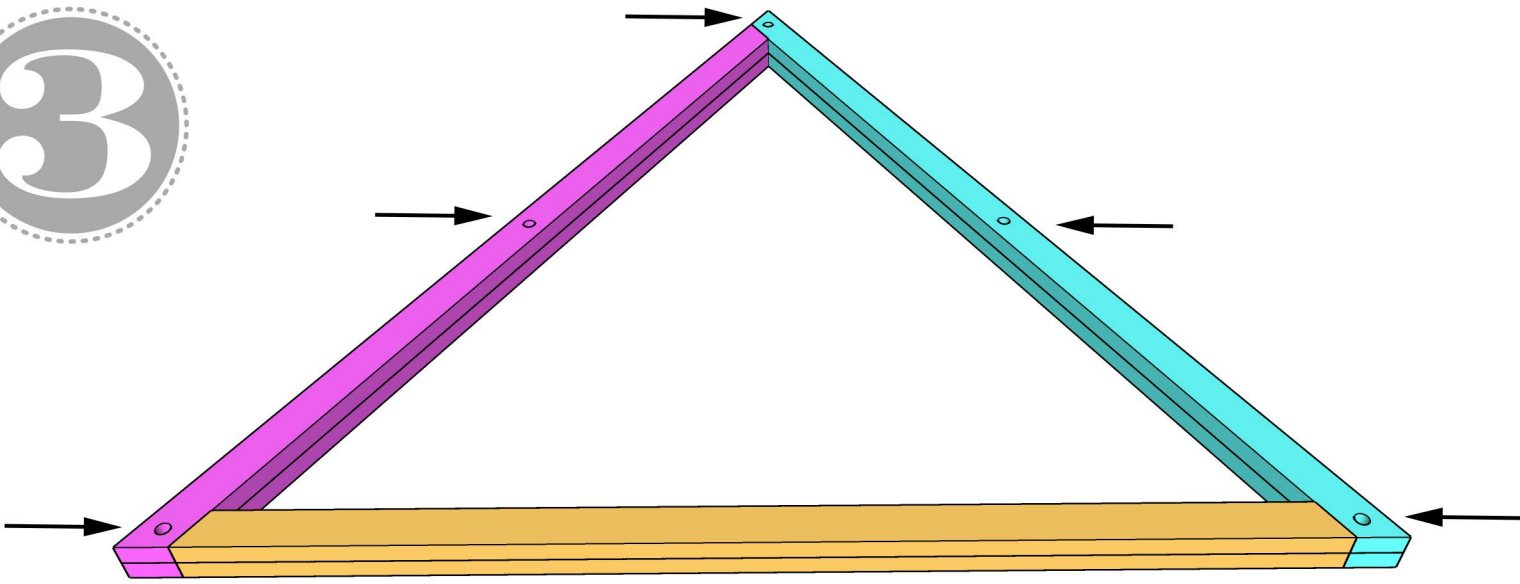

Attach the bottom frame piece to the side frame piece with $\frac{3}{4}$ " pocket hole screws and wood glue.

x2

Build 2 frame assemblies.

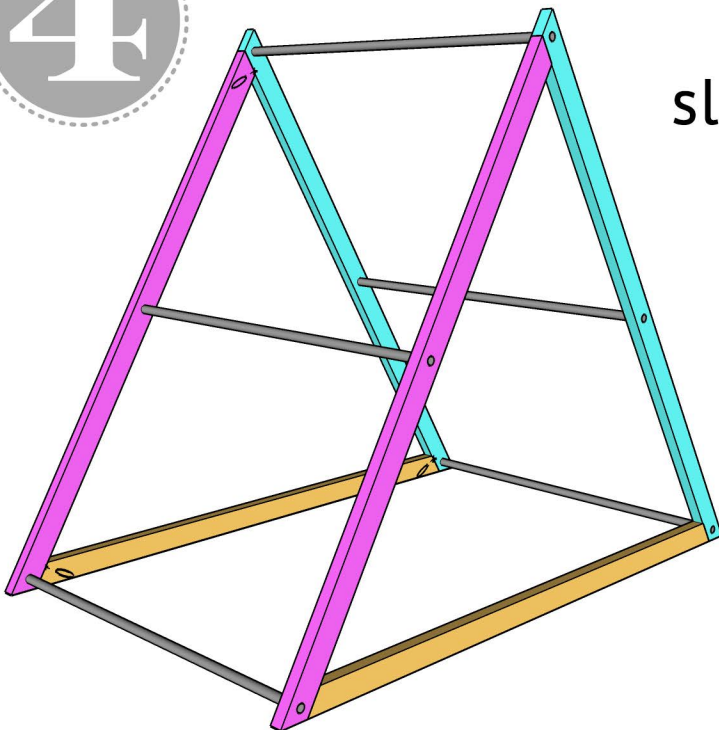

3

Stack the two frames on top of each other so that the pocket holes are facing down. With a 1/2" drill bit, drill a hole at every corner and the center of both side pieces. Make sure to use clamps to keep the frames in place while you drill.

4

Cut the dowels to size and slide them inside of the holes on one frame and then the other to create the tent. You may need to use a rubber mallet to get the dowels flush with the frame.

Once the dowels are attached, sand it down, fill your pocket holes and add a finish!

Check out our blog post to see how we created a no-sew tent cover for our new pet tent!

Make it your own and have fun with it! Be sure to share your builds with us on social media and use #shanty2chic so we can share them too!

Happy Building!
